

# DE-ICING SALT

Available in:  
10 kg - 20 kg  
40 kg - 25 lb  
50 lb - 80 lb

*Salt is the most widespread de-icing agent used in North America for several reasons: it is easy to handle, store and inexpensive to purchase. This de-icing agent is effective down to -10° C.*

*Warwick Salt has the best quality salt on the market. It comes directly from the mine using our carriers; it is drier, therefore lighter. It contains less moisture, offering you more volume for the same tonnage.*

*For information on quantities to use or spreading methods, consult with our technical advisers.*

## Superior Quality
