

DE-ICER MAGNESIUM CHLORIDE

Magnesium Chloride is safer for the environment because its chlorine content is lower than competitive products by at least a third. It is safer to use around vegetation, plants, pets and, most importantly, people.

SAFE

Magnesium Chloride reduces accidents by securing your pedestrian areas more rapidly.

NO-TOXIC

Magnesium Chloride used with moderation, will not affect the environment.

Magnesium Chloride Flakes by Warwick Salt is a high performance product. With its exothermic action, it melts ice in conditions as low as -25°C ; compared to conventional salt whose de-icing effectiveness is limited to a temperature of -10°C .

Furthermore, Magnesium Chloride Flakes will not leave stains or rings on carpets, floors and trousers. It will effectively thaw out your driveways, sidewalks and roadways without leaving residues.

Directions

Remove loose snow, spread between $\frac{1}{4}$ and $\frac{1}{2}$ cup per m^2 (10 sq ft). Spread evenly and moderately. Close the bag after use. Remove the snow and melted ice.
